

NEW Transportation LTL Pallet Initiative

Date: November 1st, 2019

Attn: Belk Vendor Partners

Starting **Nov 1st, 2019** vendors will **NOT** be required to email Transportation Services for pallet approval on LTL loads of **8 pallets or less**. Belk will be implementing a new pallet policy in 2020 that will require all vendors to utilize pallets for LTL shipments. **PLEASE NOTE FLOORLOADING IS STILL REQUIRED FOR TRUCKLOAD AND IMDL SHIPMENTS.** Pallet requirements and full details are published in the Belk Vendor Guide which is available at www.belk.com/customer-service/about-us/vendor-resources/

In the interim, Please follow the below pallet requirements:

- Use standard pallets: 40"X 48"

Pallet configuration	Max Pallets	Pallet height
Single stacked	8	60"
Double stacked	16	48"

All vendors should have received a survey to gather information on shipping points and updated contact information. Please contact Belk_Traffic@Transplace.com if you have not received this survey.

Thank you,

The Belk Vendor Compliance Team
